Alliance Pumps Are The Key To Setting A New Record

3rd largest in the World.

Starting 9 p.m on Friday, May 9, 2008, through to 12 p.m Sunday May 11, 2008, 14,000+ cubic meters (18,500 yd³) of concrete delivered by 1000+ concrete mixers discharged into numerous concrete pumps to fill the foundation of The Bow in downtown Calgary, Alberta. The Bow, named for its crescent shape and view of the Bow River will cost over \$1 Billion to construct with an additional \$1 Billion for the interior. With a footprint of 17,651 m² (190,000 ft²), the final height of The Bow will be 236 m (774 ft), 58 stories: 2 retail floors; 3 floors with sky gardens; 53 office floors;

4 mechanical floors; 1,400 parking stalls (6 level parkade, spanning two blocks), plus 15 skywalk connections to neighboring buildings.

"I will never see a project like this again" states Joe Delehay President of Dynamic Concrete who was awarded the contract to pump, place and finish the 14,000+ cubic meters of concrete for the foundation. "The only other continuous pours larger than this one were in Dubai and Las Vegas, so this is quite something. We have a good reputation in the industry for getting the job done. For this pour especially, there is little room for

Who's New To Alliance

.....

Alliance Concrete Pumps has hired Tom Oury as their new Nationals Sales Manager. Tom Oury is no stranger to the concrete industry, in fact Tom comes from a 'concrete family'. His father is a retired cement mason in Chicago - his grandfather was a Concrete Contractor in Chicago back in the 50's and both his brothers currently work in the concrete equipment industry.

Tom holds a Master of Business Administration Degree, and has worked for Somero Enterprises where he served as VP of Sales in Western Region, Asia, & Australia. Prior to Somero, Tom was the National Sales Manager for Rotec Industries, a company known for innovative solutions for mass concrete placing and finishing problems.

Tom will be based in Downers Grove, Illinois where he resides with his wife Pam. He has three children Emily, Jillian, and Samuel. "I am extremely excited about being part of the Alliance team" says Oury.

"Adding Tom to the Alliance team is an expression of Alliance's ongoing

commitment to the concrete pumping industry. Tom brings a wealth of knowledge that will help Alliance achieve its goal of being #1 in the industry for customer confidence and satisfaction." said Dave Boyle V.P Business Development. // 

New Record

.....

Continued from page 1

breakdowns or errors" Joe concludes. Dynamic Concrete completed the 3rd largest continuous pour in the world using all Alliance concrete boom pumps which included: four 55 meter; three 42 meter (lowered into the hole with excavators); two 37 meter; one 33 meter; and one JSF 17 Alliance line pump.

President of Alliance Concrete Pumps, Ken Friesen was quoted: "we are very honored that our client, Dynamic Concrete, choose to put Alliance pumps on this job site. It definitely shows their trust in our pumps".

The proposed high-rise was announced in 2006 by EnCana Corporation, North America's second largest natural gas producer. The project will eventually house all of EnCana's 3,300 Calgary-based employees. With an estimated 1,700,000 square feet (158,000 m²) of total office space, the complex is expected to be the city's largest. The towers will be Canada's tallest-built since Toronto's BCE Place, completed as Canada Trust Tower in 1990. // 

Only when your consciousness is totally focused on the moment you are in can you receive whatever gift, lesson, or delight that moment has to offer.

BARBARA DE ANGELIS

Tech Tip

Do you experience Boom Bounce?

If the boom bounces very heavily in pumping operations, check the support and correct it as required.

- Calm pumping is achieved if the rear wheels are in light contact with the ground. Do this by retracting the support feet until the rear wheels are in ground contact and then retract the support feet about 1 cm.
- If the support is correct, reduce the pump speed or change the boom position.
- The boom can also bounce if air is taken in and compressed in the delivery line. You should therefore always make sure that the agitator hopper is filled with concrete to the mixer shaft and that no air is sucked in.
- A horizontal position of the last arm is favorable for pumping.

If the last arm is lower than the horizontal, the concrete in this part of the delivery line will flow more quickly as a result of its self-weight. The flow velocity is lower if the arm position is horizontal, and thus the wear on the delivery pipes and the end hose is less.

When the pump is stopped, only the content of the end hose flows out if the arm position is horizontal; the content of the deliver line can flow out if the arm position is below the horizontal.

The strokes of the pump cause forces to act along the delivery line and thus along the boom. If the last arm is vertical, the forces also act vertically on the boom end and move the boom up and down. If the arm position is horizontal, the boom is moved forward and backwards, which causes a light rocking motion.

A winner is someone who recognizes his God-given talents, works his tail off to develop them into skills, and uses these skills to accomplish his goals.

LARRY BIRD

Trailer Mounted Line Pump AR 36

General Specifications

- Lightweight, but incredibly sturdy
- 75ft Cable remote
- Designed for shotcrete and small slab pours
- Great for 3/8" (9.5mm) pea rock and 3/4" (19mm) structural mixes
- Available with an optional remixer

Alliance Concrete Pumps Inc. reserves the right to make changes to these specifications.

Pump Specifications

Volume	28 m3/h (36 yd3/h)
Piston Face	62 Bar (900 psi)
Stroke	915 mm (36")
Bore	127 mm (5")
S-Tube Inlet	127 mm (5")
S-Tube Discharge	127 mm (5")
Diesel Engine	CAT - 60 Horsepower
Axles	1
Tires	381 mm (15")
Length	4115 mm (162")
Width	1778 mm (70")
Weight	1815 kgs (4000lbs)

These are theoretical values and may change depending on conditions of the concrete mixes.

\$43,950 USD
Plus shipping and handling

Most people never feel secure because they are always worried that they will lose their job, lose the money they already have, lose their spouse, lose their health, and so on. The only true security in life comes from knowing that every single day you are improving yourself in some way, that you are increasing the caliber of who you are and that you are valuable to your company, your friends, and your family.

Character is like a tree and reputation like a shadow. The shadow is what we think of it; the tree is the real thing.

ABRAHAM LINCOLN

Alliance Concrete Pumps was proud to participate in a recent visit to Washington D.C. "Hill Visit". The purpose of the visit was to discuss the current status of the Fuel tax credit - Senate Bill 2401.

Representatives from Alliance accompanied various ACPA board members and pumpers as they discussed the issues with their appropriate Senator representatives from New Jersey, Illinois, California,

Maryland, Montana, Texas, Florida, Georgia, and North Carolina.

The information communicated was well delivered and Alliance feels confident the message for a 55% fuel tax credit was received.

For more information, contact Dave Boyle from Alliance, or contact the ACPA office to learn more about how you can help to get the tax bill passed. // 

Parts Specials

SPECIAL #1 Wear Part Sets - Includes Wear Plate, Wear Ring & Thrust Ring.

Description	Regular Price	Sale Price
Tungsten Wear Set	\$640.00	\$575.00
Carbide Wear Set	\$1756.00	\$1575.00

Purchase more than 1 set and receive an additional 10% off!

SPECIAL #2 *** INVENTORY BLOW-OUT SALE ***

Description	Regular Price	Sale Price
Flap Elbow (Transition Door)	\$1089.00	\$650.00

Purchase 2 or more for only \$550.00 each

*** Special pricing while quantities last ***
